

Microsoft Surface Hub

Unlock the power of the group.

Unlock the power of the group with Surface Hub, a powerful team collaboration device designed to advance the way people work together naturally.

Key Features

Ink

A responsive and natural inking experience that feels as fluid as a pen on paper.

Touch

Advanced touch capabilities recognize up to 100 touch points with precision, allowing multiple people to interact with the screen simultaneously.

Windows 10

A new experience for Windows 10 that is tailored for group use, with ink and touch at its core. Many applications can be used without authentication.

Office

Microsoft Surface Hub comes with Microsoft Office apps like Word, Excel, and PowerPoint, plus the OneNote whiteboard and Skype for Business.

Best way to create and brainstorm with others

Make working together the most productive part of your day. Share your ideas with others on a canvas that is as big as your imagination. Bring teams together in a way that feels completely natural, with technology that doesn't intrude, but helps ideas flow. Expand what can be accomplished in the moment and then don't lose the momentum – capture your work so you can act on it later.

Engaging and productive meetings

Microsoft Surface Hub reimagines the meeting experience so that you can unlock the power of the group. You can walk up and join a Skype for Business meeting with a single tap, and share content effortlessly, so that you spend your time connecting to people rather than technology. And since you can easily send meeting notes and content, you can communicate outcomes and action points.

Platform for amazing large screen apps

In addition to the built-in team experiences like Skype for Business, Microsoft Office and OneNote, Microsoft Surface Hub is customizable with a wide array of applications. Universal apps built for Windows 10 shine on Microsoft Surface Hub and scale to the large screen. You can also connect apps from your personal device and drive them from Microsoft Surface Hub.

Designed for the modern workplace

Microsoft Surface Hub integrates beautifully into the modern workplace, enabling productivity in any space where people come together to get things done, from large conference rooms to informal huddle spaces to offices. The fully integrated design, choice of two screen sizes, and flexible mounting configurations means there's a solution for your business needs. Microsoft Surface Hub is also designed to be easy to deploy and manage remotely.
